Warp 9 Racing's Short-Style Folding Levers and Chain Guide

by Aaron Demo

Warp 9 Racing started as a quality discount aftermarket wheel supplier and has stepped up with some great CNCed farkles for your bike. I recently added the *Warp 9 Racing's* short style folding clutch and brake levers to my 2006 *DR650* and was immediately impressed. Besides looking great, the short levers were a breeze to install with the included hardware. They fit nicely behind my *Barkbusters* handguards without any adjustments. The action was smoother than the stock levers, and they are fully adjustable to accommodate different hand sizes and personal preferences for both clutch and brake pull. With an MSRP of \$39 for each lever, you will be hard pressed to find a better value for your money.

I also installed the *Warp 9 Racing* black chain guide to replace the OEM plastic unit that was broken. The chain guide is easy to install without removing the chain or the rear wheel, and has a replaceable *Delrin* lower slider-block. A diagram of the chain guide showing where to put the spacers would have sped up the installation a little, but it didn't take long to figure out where they belonged. At \$59.99,

another great deal from *Warp 9* as they continue to bring adventure and dual-sport products to their line-up. Warp9Racing.com

PROS

- Excellent price point on all items
- Easy lever install. Fits behind bark busters without having to cut levers
- Excellent durability
- Great looks

CONS

- Diagram for chain guide installation would be helpful
- Only one color available
